3.4. 全件検索

【作業手順①】 findAll メソッドで全件データ取得

…/controller/ProductController.java

```
 1:
 2:@Controller
 3:@RequestMapping("/product")
 4:public class ProductController {
 5:     @Autowired
 6:     private ProductRepository prodRepo;
 7:
 8:     @GetMapping("/findAll")
 9:     public String showProductList(Model model) {
10:             List<Product> list = prodRepo.findAll();
11:             System.out.println(list);
12:             model.addAttribute("products", list);
13:             return "product/list";
14:     }
15:}
```
